

College of Education

Start earning the career you deserve now

Join the thousands of working professionals using their skills and specialties to start a new career in teaching. Wayne State University is offering bachelor's degrees and a special, customized Master of Arts in Teaching for engineers to capitalize on what you already know to put you in the classroom as a science or math educator right now.

Earn your degree now

To be effective in today's educational environment, educators must constantly update and expand their expertise. They need to apply work-world situations to the concepts they are teaching. Our concentrated courses are designed to provide a framework for the knowledge and experience you already have while increasing your effectiveness and improving your career potential.

Learn from Southeastern Michigan's leading College of Education

Wayne State University offers one of the most relevant degrees in the field of education for engineers, businesspeople and others interested in teaching math and science. Hundreds of professionals have already changed their lives by earning a Bachelor of Arts or Bachelor of Science in Mathematics or Science Education and teacher certification, or a Master of Arts in Teaching in Mathematics Education, Science Education or any other degree that aligns with your existing major and minor.

Accelerate the program with flexible, online modules

At Wayne State, you can attend classes in person or online at times and places that fit your schedule — at home in the evenings, at work during lunch, or while you're on summer break. No commuting. No lines. No wasted effort. Taking a combination of in-person and online courses allows you to accelerate the program at your convenience.

As an example, the following graduate Career & Technical Education (CTE) courses are currently taught online:

CTE 6010: History & Principles of CTE offered during Summer Session

CTE 8998: Current Issues & Trends in CTE offered during Fall Term

CTE 7820: Planning & Organizing Instruction in CTE offered during Winter Term

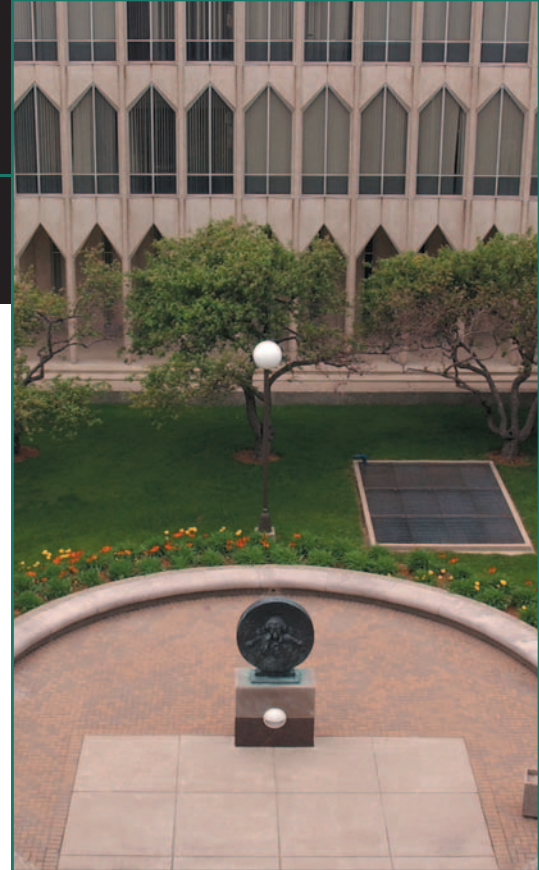

The following courses are in the process of being developed:

CTE 6999: Coordination of Cooperative Programs

TED 7000: Introductory Master's Seminar

ED 7999: Master's Seminar

All of the core CTE courses for the M.Ed. program will be available in an online format by Fall 2006 — one of the few in the nation.

Alternative Pathways to Teacher Certification

The College of Education has developed an Alternative Pathways to Teacher Certification program in response to a national need for teachers in critical areas. This program has been created for you, the adult learner, looking for a second career in teaching that builds on your life and work experiences. Alternative Pathways includes courses scheduled at times and in locations convenient to students and cohort groups, online modules, cohort meetings, core classes, mentoring, academic tutoring, and leadership development.

Don't wait any longer

The sooner you start your education courses, the sooner you'll have the skills, knowledge and credentials you need to excel in your chosen profession. We have developed a pre-application process, requiring a basic skills test, a criminal background check and submission of your transcripts of your coursework, so you can work with our advisors to get you started as soon as the spring 2006 semester. You may even be eligible to work on-the-job in a classroom from the beginning of the program.

Get started today

Best of all, by taking our customized education courses, you can earn your degree in about two years. Just register for classes and start learning.
